Founded in 1994, EGC, Inc. (EGC) provides experienced environmental, geosciences, and construction management consulting support to public and private clients nationally. EGC's team of professionals have worked for large, national firms, and government entities managing the performance of large projects in the areas of environmental compliance, geology, hydrogeology, chemistry, engineering, remediation, and risk assessment/toxicology, and construction/construction management. All of our staff and our vast network of technical professionals have significant field experience in the collection and analysis of geological, hydrogeological/hydrological, environmental, and construction data to support detailed projects, studies and reports.

### Why Choose EGC?

- ◆ **EGC's Environmental Group** assists clients with identification, assessment, and resolution of issues to meet and exceed regulatory reporting and compliance goals
- ◆ **EGC's Construction Group** helps clients incorporate integrated design criteria, such as LEED standards, into projects to comply with Federal mandates related to indoor environmental quality, water conservation and efficiency, and energy/atmosphere/materials resources usage
- ◆ **EGC's Geosciences Group** provides clients with the technical expertise to solve complex problems in the engineering, environmental, and construction fields in a cost effective manner

### Recent Projects

- ◆ Joint Base San Antonio Fort Sam Houston (JBSA-FSH) - \$2.5M/1yr  
Provide engineering advisory and technical assistance to 502d CES
- ◆ Air Force Environmental Compliance Assessment and Management Program (ECAMP) - \$570K/2yrs  
Facilitate audits of all environmental compliance programs
- ◆ Air Force Center for Engineering and the Environment (AFCEE) - \$310K/4yrs  
Support environmental/restoration of all field activities, program requirements, and technical subject mater expertise
- ◆ Naval Air Station Fallon, Naval Facilities Engineering Command Southwest (NAVFAC Southwest) - \$93K  
Update Stormwater Pollution Prevention Plan
